PERSONAL STATEMENT

Experienced software developer and systems administrator, skilled in technologies including PHP, Selenium WebDriver, Vagrant, Docker, Python, Ruby, MySQL, Postgres, Ubuntu and centOS.

I pride myself on being a fast learner who is more than capable of getting up to speed on new technologies.

RELEVANT WORK EXPERIENCE

Full Stack Developer – Wirebox Consultancy (*November 2015 – present*)

Responsibilities include analytics integration (Google Analytics and Facebook Pixel), asset optimisation, WordPress and Laravel integration, SQL report generation and server maintenance (Apache and NGINX).

Some examples of projects I have developed for clients include:

- A cron task to back up invoices at the point of creation on the client's Windows server to their AWS server, over SSH
- Generating monthly CSVs listing details of thousands of vehicles queried against the DVSA API, using sanitised vehicle registrations provided by the client
- Generating lead forms to integrate with an in-house CRM, including development and customisation of API endpoints

RELEVANT EDUCATION

NCFE Level 2 Certificate in Understanding Data Protection and Data Security - NWLSC (*July 2019 - September 2019*)

BTEC Level 3 Advanced Apprenticeship for IT, Software, Web and Telecoms Professionals – 3AAA Academy (*November 2015 – November 2016*)

Utilised technologies including Windows Server 2008 and Cisco Packet Tracer.

INTERESTS / HOBBIES

Volunteer as a projectionist and sound engineer (ad hoc) at local church services.

Interests include STEM (maths, physics, programming etc.). Some examples of personal projects can be viewed on https://github.com/ArunSahadeo, https://stemlive.github.io and https://arunsahadeo.github.io.

Currently improving my knowledge in areas including networking and SQL query optimisation.
